**#influencer:**

## How Social Media is Shaping Our Kids

**June 4, 2024**

**7:00 PM - 8:00 PM**

**via Zoom**

Social media is flooded with trends, challenges, and extreme content. From promoting products to glamorizing substance use and risky behaviors, our youth are avidly consuming this content, gradually becoming desensitized. In this discussion, we delve into the impact of social media on the younger generation and explore the content they encounter, which plays a significant role in shaping attitudes, behaviors, and perceptions.

This program is for parents and caregivers of children of any age with cell phones or tablets.
